Tewkesbury Nature Reserve Butterfly surveys 2014/2015/2016

TNR have done a lot of work to improve the habitat on the reserve since 2014, we hope that the increase of species spotted in 2015 reflects these changes? We have planted a flower meadow and as this matures this should increase the numbers of butterflies seen on the reserve.

The TNR butterfly count for 2014 which took place in July and August resulted in some 108 butterfly sightings from 6 individual counts. We have now completed the 2015 and 2016 counts and we have added the year each were spotted.

Meadow Brown
2014, 2015, 2016

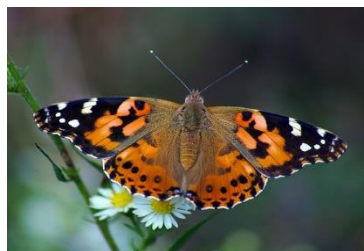

Small tortoiseshell
2014, 2015, 2016

Small White
2014, 2015, 2016
